Education

Indian Institute of Technology (Banaras Hindu University), Varanasi

BTech in Mining Engineering (2024-Present)

Current CGPA: 7.89

Narayana Group of Institutions, Bengaluru

Class 12 - Central Board of Secondary Education (2024)

Percentage: 94%

Class 10 - Central Board of Secondary Education (2024)

Percentage: 91%

Skills

- **Languages:** C, C++, Python, HTML, CSS, JavaScript
- **Tools and Frameworks:** React, Git, GitHub, Firebase
- **Areas of Interest:** Data Structures and Algorithms, Competitive Programming, Web Development, Systems Programming

Projects and Experiences

Miniature Git Clone

November 2025

- Built a low-level version control system from scratch as part of the CodeCrafters "Build Your Own Git" challenge.
- Implemented Git's core plumbing commands - including init, hash-object, cat-file, and commit-tree - to replicate Git's internal object storage and version tracking mechanism, all using C++.
- Engineered a content-addressable file system for blobs, trees, and commits using SHA-1 hashing and zlib compression to optimize storage and retrieval.
- Integrated CLI commands for creating commits, linking parent commits, and reconstructing repository history from serialized objects.
- **Exposure:** File Systems, Data Serialization, SHA-1 Hashing, zlib Compression, CLI tools, C++, Git Internals, Systems programming | [CodeCrafters](#)[↗] | [GitHub](#)[↗]

Quick Notes: Cloud-Synced Note-Taking Web App

- Built a dynamic note-taking application with a dark/light theme toggle and a responsive, user-friendly UI.
- Integrated Firebase Firestore for secure cloud storage and real-time synchronization of notes.
- Implemented efficient CRUD functionality (create, edit, delete) with local caching and smooth DOM updates.
- Followed modular JavaScript practices for scalability and maintainability.
- **Exposure:** JavaScript, HTML, CSS, Firebase | [GitHub](#)[↗]

Hult Prize (On Campus), IIT BHU

February 2025

Kavach Tech

- Pitched a concept for wearable safety devices integrated into everyday accessories that enable discreet emergency alerts; reached final round and secured 4th place amongst the finalists.
- Presented a deck which covered key aspects like Target Markets, Go-to-Market Plans and Financial Projections.

T-Rex Game using JavaScript

Developed a browser-based 2D endless runner game using JavaScript and the *p5.js* libraries with modular JavaScript files, featuring a main animated character, obstacle generation, and real-time collision handling, with a mobile-friendly design. Created an interactive UI with the help of JavaScript libraries.

Roles and Responsibilities

Events Associate | E-Cell | IIT BHU

June 2025 - Present

- Collaborated with startup founders, alumni, and industry mentors to curate problem statements, onboard corporate partners, and form judge panels for flagship innovation events.
- Contributed to event planning and execution, improving mentor participation and event visibility. Played a key role in organising events like Google Techstars Startup Weekend, Startup Junction'25 and E-Summit '26.

Tech Team Member | Kashiyatra'26 | IIT BHU

October 2025 - Present

- Maintained and updated the official fest website, ensuring smooth performance, accurate content, and timely event updates.
- Worked on the frontend of the website, and collaborated with the organizing team to implement UI improvements and resolve technical issues.

Clubs and Extra Curriculars

- Core member of the Quiz Club, IIT BHU, with multiple wins in college-level quizzes and representation of the institute at Inter - IIT 7.0 & 8.0, Nihilanth '25, and Kashiyatra '25.
- Recreational badminton and squash player; participated in Spardha '24.
